

WEP700 BLUETOOTH® HEADSET

AWEP700JBECXAR SPECIFICATION SHEET

Sitting in the bleachers surrounded by cheering fans, walking down a windy city street, riding in a convertible or worse yet on a lawn tractor... these are all places where people wouldn't dream of trying to make a call... until now. Samsung knows that under extreme circumstances, you need more than a good signal to have a clear conversation. The Samsung Mono Bluetooth Headset (WEP700) goes to the extreme, putting multiple technologies to work for you and delivering superior voice clarity.

The WEP700 provides revolutionary noise cancellation through digital signal processing (DSP). Employing two microphones with voice separation technology, the WEP700 combats annoying ambient noise like wind, background chatter, and music. By using Bluetooth version 2.0 with EDR, this headset further ensures your conversations will be crystal clear. And as the ambient noise levels change, this headset is quick to respond with automatic volume control.

The WEP700 is packed with additional features that matter to people who are on the go. For instance, the on-the-ear design of this headset provides the flexibility of a detachable ear hook, which is both small and lightweight.

The WEP700 is making shouted phrases like "What did you say?" and "I'll have to call you later when I can hear" things of the past. If you want a high-performance headset that can drown out the noise of the fast-paced world in which you live, the Samsung WEP700 is the clear choice.

FEATURES

- Advanced noise and echo cancellation technology
- Auto volume control
- Detachable, lightweight earhook

Bluetooth Headset Pairing Instructions

1. When you turn on your Samsung Bluetooth headset for the first time, it proceeds into pairing mode immediately.
2. If you have paired the headset with other Bluetooth devices, make sure that the headset is off. Press and hold the Multi-Function button until the blue indicator light stays solid blue after blinking.
3. Set your Bluetooth phone to discover the headset by following your phone's guide. Typically, the steps involve going to a 'Setting', 'Connection', or 'Bluetooth' menu on your phone and then selecting the option to discover Bluetooth devices.
4. Your phone will find the Samsung headset and ask if you want to pair with it. Confirm this by pressing the Yes or OK key.
5. Enter a passkey or PIN, 0000 (4 zeros), then press the Yes or OK key.
6. If pairing was successful, the indicator light will flash in blue 10 times rapidly before going to flashing every 3 seconds. If unsuccessful, the light remains on, and you will need to re-attempt pairing.
7. When you turn on your headset after pairing with the phone, the headset is automatically connected to the phone.
8. When you turn on your phone after pairing with the headset, the phone is connected to the headset by pressing the Multi-Function button.

SAMSUNG

“number one in brand loyalty seven years in a row”

Samsung mobile phones have been rated number one in brand loyalty by consumers seven years in a row, according to Brand Keys, a leading independent authority on brand loyalty.

* Many of the services and features described above are network dependent and may require additional subscription and/or usage charges. Not all features are available for purchase or use in all areas. Other conditions and restrictions apply. See carrier for more information. All talk and standby times are approximate. Battery performance depends on network configuration, signal strength, operating temperature, features selected, and voice, data, and other application usage patterns.
